Description:

A027 is single wall airless pump bottle,all parts are injected.It has 15ml 30ml 50ml 80ml 100ml volume for your choice.Color and print can be customized.
If choose clear body,it will show product's color and it is perfect for premium foundation cream.
MOQ is 5000pcs for customized.But here will be some quantities in stock,so the small quantity order is also no problems!

Why use airless bottle:

Airless pump bottles protect sensitive products such as natural skin care creams, serums, foundations, and other preservative-free formula creams by preventing them from excessive exposure to air, thus increase product shelf life up to 15% more. This makes airless technology become the new future of cosmetic, beauty, and medical packaging.
The airless bottle has no dip tube but rather a diaphragm that rises to evacuate the product. When user depresses the pump, it creates a vacuum effect, drawing the product upwards. Consumers can use almost all of the products without any waste left and they don't have to worry about the problem of the standard pump that do not work appropriately for many products.
